

Finally...  
a step solution for all  
sloping sites

Simple. Quick. Affordable

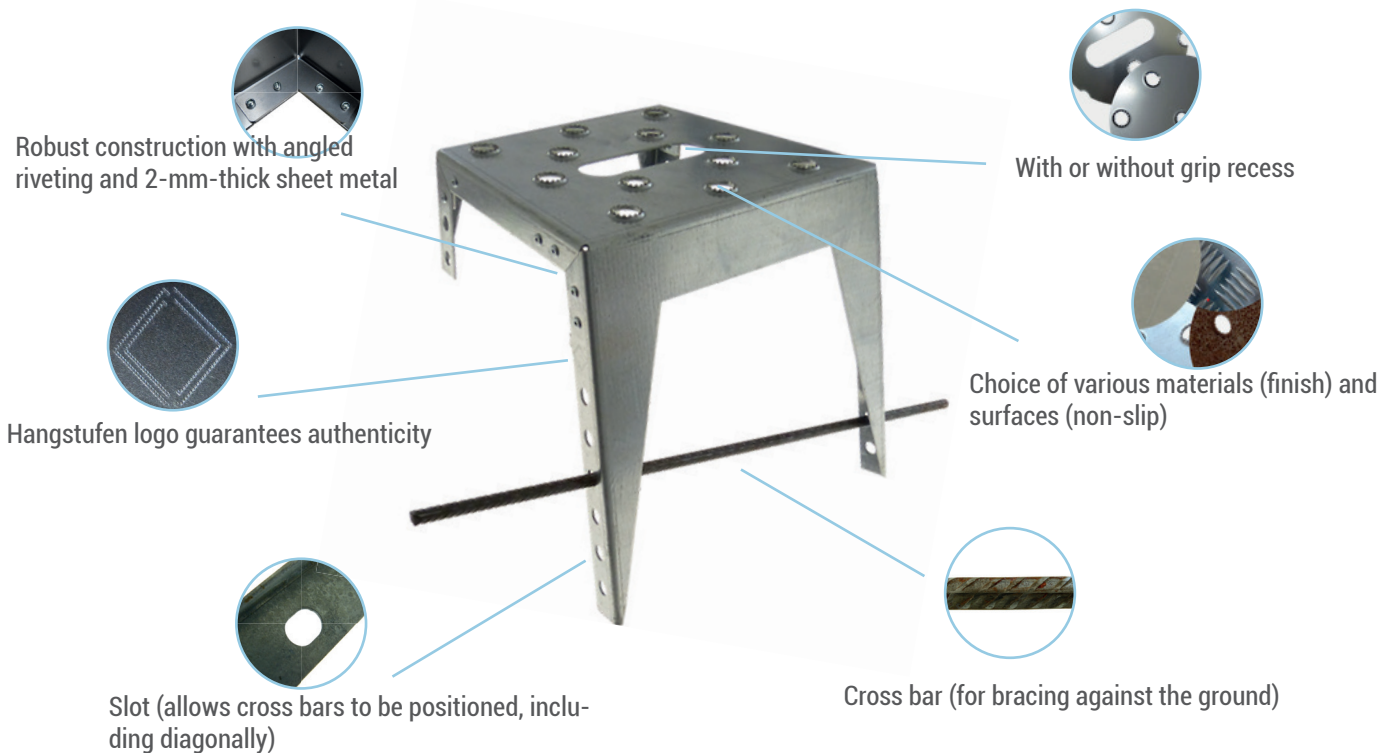

## Benefit from maximum flexibility & stability

Are you looking for an easy way to make sloping sites accessible? Do steep gradients regularly cause you trouble when gardening? Are you looking for steps for creating shortcuts across steep slopes?

## Benefits & advantages

- Quick and easy to install
- Secure footing when climbing and standing
- Robust and non-slip
- For mobile or permanent use
- No construction procedures required
- Protect plants growing underneath
- Make new areas accessible
- Flexible applications for different gradients
- Nine different sizes available
- Available in various finishes
- Available with or without grip recess
- Stackable
- Removable
- Keeps shoes clean

## Slope steps

„Natural“
